

Combatting COVID-19:

Cleaning Services

SC Companies Inc. is an expert remediation and cleaning firm and we're here to help! We are IICRC Certified with extensive knowledge and experience in biohazard cleaning. SC protocol is as recommended by RIA (Restoration Industry Association) and IICRC (Institute of Inspection, Cleaning and Restoration Certification), and has incorporated guidelines from the CDC and EPA. This protocol includes extensive cleaning touchpoint of surfaces with EPA registered disinfectant products and working to remove aerosol particles throughout HEPA air filtration devices and HEPA vacuuming. The protocol provides remediation for *businesses, community associations, home builders, commercial developers, government offices, schools, and other establishments.*

- **Basic Covid-19 Cleaning is enhanced cleaning to current cleaning procedures.** This service is an added level of cleaning to common/shared touchpoints. This service includes AIR Filtration during service, biowash with EPA registered Disinfectant of shared touchpoints- includes door handles, stair rails, grab bars, shared office equipment, etc... HEPA vacuuming of flooring is optional and recommended.
- **Advance Cleaning is for special circumstances or after a positive Covid-19 Test.** This service can include advanced biowash of all surfaces, carpet cleaning, fogging, and/or duct cleaning.
- **ATP Cleaning Verification- Instant Read Testing provides indication of surface cleanliness.** SC Companies utilizes the Hygiena™ ENSURE monitoring System with Ultrasnap- surface ATP swabs. ATP Cleaning Verification can be combined with our COVID-19 Cleaning Services or as stand alone testing.
- **Frequency Options:** daily, weekly, monthly, or as needed.

TIPS:

1. Most disinfecting products have a dwell time of 30 sec to 10 min. Read product labels—adhere to dwell times when possible. Dwell time or (contact time), refers to the amount of time that a disinfecting product needs to sit (or dwell) on a surface in order to kill organisms.
2. **We strongly recommend any cleaning treatments be done by IICRC/ RSA certified remediation firm. Proper cleaning procedures can reduce and limit virus spread, improper cleaning procedures can have the opposite effect.**
3. We recommend asking any vendors that have increased pricing for COVID-19 to list COVID increase as a separate line item on invoices they send to communities. We recommend tracking all Covid-19 related expenses, in preparation should businesses be able to deduct or receive reimbursement for Covid-19 costs.
